Education

Sasi Institute of Technology and Engineering

Aug. 2023 – May 2027

Bachelor of Science in Computer Science [C.G.P.A: 8.05]

Tadepalligudem

Relevant Coursework

- Data Structures
- Python
- Artificial Intelligence
- GenAI
- MERN Stack
- Database Management
- UI/UX design
- flask

Projects

Jarvis AI OS | *Python, Llama 3, Whisper, Piper TTS, Playwright, SQLite*

January 2025

- Developed a modular, voice-controlled personal AI assistant integrating Llama 3, Whisper STT, and Piper TTS for natural voice-based interaction and local AI processing.
- Engineered a multi-agent architecture with specialized Browser, Research, and system agents, enabling Jarvis to autonomously route user requests to appropriate capabilities.
- Built a task-execution pipeline using input normalization, intent detection, parsing, planning, skill routing, and execution, supporting commands such as web navigation, application launching, search, and calculations.
- Implemented persistent SQLite-based memory and Playwright browser automation, enabling contextual interactions and automated browser control while maintaining a modular, extensible architecture.

SkillSwap Platform | *Python, Flask, MySQL, Scikit-learn, Pandas, HTML/CSS, JavaScript, GitHub*

June 2026

- Identified the challenge of learners struggling to find suitable mentors and students lacking a structured platform for peer-to-peer skill exchange.
- Designed and developed an AI-assisted platform to intelligently connect learners with mentors based on skills, experience, availability, language, interests, ratings, and learning requirements.
- Built a full-stack Flask application with MySQL database integration, authentication, skill and profile management, AI-based compatibility scoring, mentor recommendations, session scheduling, completion confirmation, ratings, and achievement tracking.
- Delivered an end-to-end peer-learning platform that automates mentor discovery through data-driven recommendations and provides a structured workflow from skill matching → session scheduling → learner confirmation → feedback.

Gym Management System | *MERN Stack*

October 2025

- Developed a full-stack web application for managing gym members, subscriptions, attendance, and trainer information.
- Implemented secure user authentication, role-based access control, and an administrative dashboard.
- Designed RESTful APIs using Node.js and Express.js with MongoDB for efficient data management.
- Built a responsive user interface using React.js to improve usability across desktop and mobile devices.

Portfolio Website | *HTML, CSS, JavaScript*

August 2025

- Designed and developed a responsive personal portfolio to showcase projects, certifications, and technical skills.
- Implemented smooth navigation, responsive layouts, and modern UI principles for an improved user experience.
- Optimized website performance and deployed the project using GitHub Pages.

Technical Skills

Programming Languages: Python, JavaScript, SQL

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

Databases: MongoDB, SQL

Artificial Intelligence: Generative AI, Prompt Engineering, AI-Assisted Development, LLM Fundamentals

Developer Tools and Cloud: GitHub, VS Code, AWS, google cloud

Achievements and Certifications

- 3 star Rated Programmer on CodeChef, Max rating:1644
- Participated in IEEE Xtreme 19.0 Global Programming Hackathon
- IEEE Computer Society Student Branch Member
- Basics of Python — Infosys Springboard (March 2025)
- AI Tools Workshop Certification — Be10X (April 2026)
- Build With AI Bootcamp — Organized by Hack2Skill and co-hosted by Google (June 2026)
- Generative AI Leader Professional Certificate — Google Cloud Coursera, Jul 2026
